

Homeschool Graduates 2017

Zech Bradfield
During the past four years, I have enjoyed being in two drama productions, attending the tech center, and making friends with some amazing people. I like staying up late into the quiet of the night, photographing, and messing with my car. This summer I am going to get a job with a construction company and start electrician school. Eventually, I would like to get a degree in business and start my own company.

Jimmy Helmka
Jimmy enjoys hanging out with friends and playing basketball, baseball, golf, airsoft, and paintball. God willing, he will be pursuing a bachelor's degree in Mechanical Engineering or, by some miracle, pursuing a career in the NBA!

Camryn Peets
Camryn has been homeschooled for three years. She is involved with dance, volunteer work, and work as a caregiver. Camryn plans on majoring in political science and international relations but has ambitions of eventually becoming an attorney and working in human rights and immigration.

Daniel Calkin
After I graduate, I plan on working over the summer and taking basic college classes at MCC in the fall with plans to then transfer over to Cornerstone University to major in Business Management and Business Finance. My plans for this summer is being the best man in my brother Jonathon's wedding, going out to the west coast to see my oldest brother Brett, and spending great time with my family. I have been grateful for the journey I have been on, and I am excited to see the next steps that the Lord will lead me in. Joshua 1:9

Hailey Hulst
I have enjoyed the past twelve years being homeschooled! I love reading, swing dancing, cooking, and having long deep conversations. High school for me was the most challenging and one of the most amazing parts of my life; I wouldn't change one moment. I plan to take a gap year to think and pray about the next chapter in this journey called life.

Jacob Rasmussen
Jacob Nels Damron Rasmussen, son of Erik and Amy Rasmussen of Grand Haven, has been homeschooled his whole life. He enjoys hanging out with friends; playing laser tag, paintball, video games; and going to youth group. He has helped out in the children's program at his church and has been very involved in summer camp throughout his whole life. He had the privilege of participating in many theater events with his latest playing the lead role as Christian in Pilgrim's Progress. Jacob plans to attend either MCC or GRCC in the fall and to follow God's plan for his future.

Alec Goff
Alec is an entrepreneur who owns Essential Lakeside Services. His hobbies include skateboarding, snowboarding, playing piano and guitar. He plans to continue his education in business and investing.

Samuel Knapp
Samuel Harrison Knapp has been home educated his entire life. In his free time, he enjoys playing basketball, sharpening his culinary skills, creating websites, and being on the sound team at church. He is continuing his educational career at Baker College where he plans on majoring in Computer Engineering.

Chloe Tuttle
Chloe Elizabeth Tuttle was born in Missoula, MT, to Robert and Peggy Tuttle on May 18, 1999. Since then, she has been learning and growing by the beaches of Lake Michigan. Chloe was homeschooled and attended co-ops throughout her schooling. She loves reading adventure books, learning about God's creation through science, laughing with friends, and sitting in the sun. Chloe will attend Montana State University in the fall for Cell Biology and Neuroscience.

Jacson Ott
I really enjoy working with technology and plan to attend Davenport University in the fall to further my knowledge in the subject. Apart from technology, my passions include snowboarding, dirt bike riding, videography, serving at church, and tinkering with various other things. I look forward to seeing what God has instore for me in this next stage of life!

Isaac Zenz
I grew up on a moisture farm and took my first steps toward my destiny when I purchased two droids, but when one went missing I went out to find him and encountered Obi-Wan Kenobi. I discovered the runaway droid contained a message for Obi-Wan from a Princess beseeching him to help defeat the Galactic Empire. Obi-Wan offered to take me to Alderaan and train me in the ways of the force. Now that I've graduated, I plan to travel with a wookiee to an undecided college in the fall.

*Congratulations
Graduates!*
