

DISMEMBERMENT ABORTION

DILATION AND EVACUATION OR D&E

12 TO 24 WEEKS

1. The cervix is prepared 24-48 hours in advance with laminaria (seaweed) which absorbs water and swells to open the cervix.

2. Metal dilators and a weighted speculum are used to further open the cervix as needed.

3. A suction catheter is inserted and amniotic fluid is suctioned out. At 20 weeks, the baby's bones are too hard to suction through the tube.

4. A Sopher clamp is used to grasp the arms and legs to tear limbs from the baby's body.

5. One-by-one, the baby's limbs are removed.

6. The baby's head is grasped and crushed by the abortionist and the skull pieces are removed.

7. The placenta and left over baby parts are removed with a curette by scraping the lining of the uterus.

8. The baby's body parts are collected and reassembled to be sure all pieces were removed.

Right to Life
of Michigan

P.O. Box 901, Grand Rapids, MI 49509-0901
616-532-2300 • info@rtl.org

The following churches and school have Petitions that you can sign to STOP this:

First Congregational Church of Fruitport, 3212 Pontaluna Road

(Saturday Service: 6pm; Sunday Services: 10:30am)

Calvary Bible Church, 4617 Grand Haven Road

(Sunday Services: 10:30am, 5:00pm)

Grace Evangelical Lutheran Church, 2651 Shettler Road

(Sunday Services 9:00)

Trinity Baptist Church, 4381 S. Sheridan Drive

(Sunday Services 11:00am, 6:00pm)

Calvary Christian School, 5873 Kendra Road

**These churches also have a Heart Beat bill petition to sign.
Both bills will help reduce abortions in Michigan.**

MPS Ultrasound Fundraising Drive!

by Brian Zwart

Muskegon Pregnancy Services in Muskegon, Michigan has been providing women with alternatives to abortion for nearly 35 years. They were established as a faith-based 501(c)(3) in 1985 and have empowered hundreds of young men and women to choose Life!

In the last 12 years, MPS has performed over 2,000 ultrasounds in the Muskegon community at no cost to the patient. Studies have shown that when an abortion-minded woman sees her baby's heartbeat on an ultrasound, she is 80% more likely to have the baby; and men

are 90% more likely! Muskegon Pregnancy Services also witnesses to their patients by sharing the love of Christ and provides counseling services for both men and women.

Ultrasounds may be one of the biggest threats to the abortion industry, because it shows truth of life and human development in the womb, and we'd like to see as many free ultrasounds be completed as possible. Calvary Bible Church in Muskegon, Michigan is partnering with MPS to raise money to support the ultrasound program, which includes the purchase of a new ultrasound machine and the supplies and operational costs that go with it. The average cost to perform an ultrasound is \$300.

Our goal is to raise \$55,000 to help support the MPS Ultrasound Program that has saved thousands of lives over the years.

Abortion is an absolute travesty and must be stopped, please prayerfully consider how you can financially help support this program and help end abortion in our community.

This fundraiser was organized on behalf of Muskegon Pregnancy Services. Donations are 100% tax deductible. Please visit www.gofund-me.com/lf/mps-ultrasound-drive to donate. Or call 231-726-2677

The Truth About Vaccines?

by Lisa A. Middlecamp-Lowder, Ph.D.

For decades we have been told that vaccines helped stop epidemics and save the lives of people around the world. But who was making this claim? By chance, was it funded by the industry that stood to gain financially from selling the vaccines? And, what if vaccines actually harm the immune system and lead to illness later (and sometimes immediately)? We need to ask these hard questions as now the statistics show that the U.S. ranks the highest in infant mortality of the 20 wealthiest nations on earth. We need to ask why fibromyalgia and autoimmune diseases are skyrocketing. We need to question bypassing our innate protection (skin, digestive system) and injecting unknown matter directly into our muscles.

PLEASE, DO YOUR OWN RESEARCH. And when you do, be aware of funding sources.

Did you know....

The immune system:

* We have a 2 part immune system: The cellular branch of the immune system makes us look sick because it is digesting and getting rid of the germ (measles, chicken pox). The humoral branch of the immune system produces antibodies and recognizes/identifies things that would harm us ("germs"). A healthy balance of cellular and humoral immune function is vital to good health. **Vaccines bypass the cellular system by direct stimulation of the humoral branch.**

* Research shows that vaccines can overstimulate the humoral branch and inhibit the cellular branch, leading to immune suppression. Immune suppression and over stimulation of the humoral branch may show up as **allergies, autoimmune disorders, neurological disorders, etc.**

* Breastfeeding, probiotics, antioxidants, and allowing the natural course of illness to occur enhance immune balance while heavy metals, toxins, infant formula, Tylenol, antibiotics and sugar lead to immune imbalance.

The eradication of disease and facts about vaccines:

* **80% of the total decline in mortality**, since records began to be kept in the United Kingdom in 1860, **occurred before any vaccine** or antimicrobial drugs were available and 90% or more before there was any national vaccine program.

* **Diseases declined and longevity increased due to hygiene, running water and refrigeration and stopping the use of DDT.**

* The H1N1 flu vaccine is **60 times more likely to cause a miscarriage** than regular seasonal flu vaccines according to VAERS (Vaccine Adverse Event Reporting System).

* The oral polio vaccine was banned from use in the United States in 2000. The reason for this ban was because **too many children were developing vaccine associated paralytic polio (VAPP)** as a serious side effect of the oral vaccine.

* In 1977, **Dr. Jonas Salk** who developed the first polio vaccine, **testified** along with other scientists, that **mass inoculation against polio was the cause of most polio cases in the USA** since 1961.

Vaccine Ingredients:

Here's what the **CDC** tells us of the common substances found in vaccines:

- Aluminum gels or salts of aluminum which are added as adjuvants to help the vaccine stimulate a better response.

- Antibiotics are added to some vaccines to prevent the growth of germs (bacteria) during production and storage of the vaccine.

- Egg protein is found in influenza and yellow fever vaccines, which are prepared using chicken eggs.

- Formaldehyde is used to inactivate bacterial products for toxoid vaccines, (these are vaccines that use an inactive bacterial toxin to produce immunity.)

- Many vaccines contain human diploid cells which were extracted from aborted fetuses.

- Thimerosal is a mercury-containing preservative that is added to vials of vaccine that contain more than one dose to prevent contamination and growth of potentially harmful bacteria.

Vaccine Research

In late August, 2014, Senior Scientist William Thompson from the CDC came out about research data modification in the MMR/autism study of 2004. Data was omitted and changed to hide the significant link between vaccines and autism. **As of April 2018, Dr. Thompson still has not testified before Congress even though he wants to.**

* **Over 400 papers in peer reviewed journals have been published documenting and exploring vaccine injury and death.**

Profits from Vaccines:

* Each year, drug companies in the United States make over \$10 billion from vaccines.

Exemptions:

* In Michigan, right now, you have 3 ways to protect your child from vaccines - medical, religious and philosophical.

* By joining MichiganforVaccineChoice.org, you help support your right to be the decision maker of what is injected into yourself and your children.

Sources and Resources:

The movie **VAXXED** details the CDC whistleblower, **William Thompson, Ph.D.'s attempts to share the truth about the cover-up at the CDC in the 2004 study of the MMR vaccine and autism.**
