

## More Random Opinions from 84 Years of Living

by Ron Cooper

### Were the 6 Days of Creation 24 Hour Days?

Haley's Bible Handbook explained opinion is that the days were not all 24-hour days, and other experts have a similar opinion.

Billy Graham bought 750,000 of Haley's Bible Handbooks to provide at his crusades. Evidently Graham didn't have a problem with Haley's opinion.

We don't know if some of the days were longer - much longer! There are varying opinions, but the Bible does not say. According to the Bible, God created the world, and God could have done it either way. Maybe God is leaving it up to science and archaeology to figure out how long the days were.

Salvation does not depend on understanding everything God has done and how God did it. Salvation does depend on if you believe God did it!

### 80% Of Us Are Slaves

Some statistics say that 80% are not debt free. If you owe money to anyone, you are their slave until your debt is paid. You have sold yourself into slavery.

### Raising Boys

A parent raising boys needs some luck to get them through their risk-taking phase of life in one piece.

### For Whom Don't We Have Compassion?

The cruelties that are happening to our people that have been left behind in Afghanistan is terribly upsetting. It seems that the problem is because it is our people that are being killed by torture. Why are we not upset about the same thing happening to people that are not our people, happening in a big part of the rest of the world? Is it just our people who we have compassion for?

### The Devil Wants You

The devil wants you to go to hell with him. God's son, Jesus, died on the cross for your sins so you can go to heaven with Him.

If Jesus dying for your sins is not good enough or of interest to you, then you can go to hell with the devil. It's pretty simple!

Anyone who voted or participated in the dishonest presidential impeachment nonsense at the highest level of our government, should never be elected to office in our government again.

### My Christmas Tree

by Norma Knuppenburg

*I wrote this years ago when listening to a call-in program as some people thought it was wrong to have a Christmas tree.*

I don't worship my Christmas tree, but it does have some meaning for me. I'd like to share it with you.

When I look at my tree I think, "God gave us trees." Our trees grow with His loving care and direction just like we as Christians need to be doing. My tree needed a good foundation, and we need God's Word for our foundation or we will surely stumble. In the summertime we use the trees for shade; in the winter we use the wood for heat. We use the lumber for building and to make this very paper I'm writing on.

The pretty colored lights remind me of the rainbow and God's promise in Genesis 9:13-16. When I think of the electricity that makes them light I remember how much more power our Heavenly Father has. As I watch the shiny balls reflect the lights, I pray my life will reflect God's love.

The little wreath I made to hang on my tree is round, and I think of God's never ending love.

I have a little angel at the top; she has a spotless white dress, and I remember the cleansing I received from my Lord and Saviour when He saved me. Jesus made this possible because He willingly carried a wooden cross up Calvary mountain and shed His blood for you and me. He paid the price for our sins. What a wonderful gift to tell others about. I am so thankful someone took the time to tell me how I could have Jesus as my personal Saviour, and now I celebrate His birthday in a beautiful way I never knew before.

## Memories from the Fruitport 1969 Centennial

LIKE NEW . . . Jerald Alger stands with one of his favorite girls, the Fruitport Centennial Lizzie, which will be given away as grand prize of the celebration this Saturday at 5 p.m. Members of Fruitport Conservation Club are promoting the drawing for the 1928 Model A Ford. Alger bought the car for the club, headed a minor restoring project, and now hopes he wins. He's become attached to the gleaming lady.

### The Vaccine lie has been FULLY EXPOSED

Supplied by Lynz Piper-Loomis, Candidate for Congress SC-1

Project Veritas caught Pfizer scientists on camera admitting that their vaccine isn't as effective as advertised and why the vaccine mandates actually make no sense, scientifically:

Project Veritas's new undercover video exposes Pfizer scientists admitting what we all already know.

Nick Karl, a biochemist at Pfizer, said, "When somebody is naturally immune—like they got COVID—they probably have...more antibodies against the virus because what the vaccine is...that protein is just on the outside." He continued explaining, "It's just one antibody against one specific part of the virus. When you actually get the virus you'll start producing antibodies against multiple pieces of virus, not only the outside portion but the inside portion, the actual virus so your antibodies are probably better at that point than the vaccination."

Two other scientists had the same things to say. "You're protected most likely for longer since it's a natural response," said Chris Croce, senior associate scientist at Pfizer.

Scientist Raul Khandke concurred, saying, "We're like bred and taught to be like [the] vaccine is safer than actually getting COVID...you cannot like talk about this, it's not in public. If you have antibodies built up, you should be able to prove that you have those built up."

Croce added, "I feel like I work for an evil corporation...basically our organization is run on COVID money now." Croce then talked about how paranoid Pfizer is about this information getting out there. "There's eyes and ears everywhere. You don't talk about anything that could possibly implicate you or Big Pharma. Even when you shut the door to the office, it's like, 'who's listening?'"

At one point the undercover journalist tells Croce that she has had her antibodies checked recently and she has "monster immunity." Croce tells her his brother has the same result from natural infection. She asks him if she should get vaccinated. "Wait," he advises. She then asks if her immunity is as good as the vaccine and Croce replies, "probably better."

Croce then dropped this bomb: "So right now we are seeing an increase in the Delta variant. Not because of the variant but because of immune—basically [the vaccinated] antibodies are waning—they're still protected but not at that 95 percent efficacy. It's more like 70 percent."

### Marjorie Taylor Greene's 'good Christian' abortion meltdown

Republican Rep. Margorie Taylor Greene got into a shouting match with Democrats, including Betty McCollum and Rep Deb Dingell at the Democrats' "Build Back Better for Women" photo-op. Fellow Patriots:

Democrats in Congress applauded the murder of children and then went outside to pat themselves on the back for their "bravery," and I couldn't hold back any longer.

I admit it, I had to voice my disgust over their desire to kill unborn babies. So, I followed them outside and screamed at them.

Democrats yelled back that I was rude while they celebrated the murder of unborn babies – but I don't care. I won't hold back anymore; I'm here to protect all Americans, born and unborn, and I won't let them get away with it.

I will keep yelling, and I need every pro-life warrior in this fight.

The Democrat's true agenda was unveiled this week – first, they voted to murder children, then Joe Biden weaponized the FBI to go after any parent who dares to object to their children being taught Critical Race Theory or that "Heather has two mommies."

They hate kids, they hate parents, and they hate America. This radical leftist movement cannot be allowed to continue – their values are simply disgusting. They won't stop until our nation is destroyed. We can no longer be polite.

If you stand with life, if you stand with morality, if you are about to have a Good Christian Meltdown of your own, you need to do something.

The Democrats already hate me for filing articles of impeachment against Joe Biden and for fighting to protect your family and mine from their socialist agenda.

My fight to preserve life will not only add fuel to their hateful fire, and that's why I need you on my side. I cannot do this alone.

Please do all you can to help me keep fighting for life and America by donating all you can afford.

Thank you. God Bless America.

Marjorie Taylor Greene, Congresswoman (R-GA)  
Green for Congress Inc.  
3 Central Plaza #142  
Rome, GA 30161
